(54) Title: DISPLAY OF DATA ELEMENT INDICIA BASED ON DATA TYPES

(57) Abstract: When displaying a plurality of data elements, region indicia, defined according to corresponding data types, are displayed. Data element indicia representative of the plurality of data elements are displayed within a plurality of regions defined by the region indicia according to the data types corresponding to each data element indicium. Additionally, relationship indicia representative of a plurality of relationships between at least a portion of the data elements may also be displayed. An initial or selected data element indicium is displayed in a focus region of the plurality of regions. At least a second data element indicium is displayed in one of the other regions. Thereafter, the second data element indicium may be selected for display in the focus region, thereby causing at least a portion of the region indicia to be redisplayed based on the second data element indicium being displayed in the focus region.

A. CLASSIFICATION OF SUBJECT MATTER  
IPC 7 G06F17/30

According to International Patent Classification (IPC) or to both national classification and IPC

## B. FIELDS SEARCHED

Minimum documentation searched (classification system followed by classification symbols)

IPC 7 G06F

Documentation searched other than minimum documentation to the extent that such documents are included in the fields searched

Electronic data base consulted during the international search (name of data base and, where practical, search terms used)

EPO-Internal, INSPEC, COMPENDEX

### \* Special categories of cited documents:

"A" document defining the general state of the art which is not considered to be of particular relevance

"E" earlier document but published on or after the international filing date

"L" document which may throw doubts on priority claim(s) or which is cited to establish the publication date of another citation or other special reason (as specified)

"O" documents referring to an oral disclosure, use, exhibition or other means

"T" document published prior to the international filing date but later than the priority date claimed

"T" later document published after the international filing date or priority date and not in conflict with the application but cited to understand the principle or theory underlying the invention

"X" document of particular relevance; the claimed invention cannot be considered novel or cannot be considered to involve an inventive step when the document is taken alone

"Y" document of particular relevance; the claimed invention cannot be considered to involve an inventive step when the document is combined with one or more other such documents, such combination being obvious to a person skilled in the art.

"&" document member of the same patent family
